

STAIR STEP 1 — WORKSHEET

Principles Across *Dimensions*

A worksheet for mapping your socio-technical principles at every level of your organization.

How to use this worksheet: Write your team's principles in the left column. Then, for each principle, describe what it means at each level — from the individual to the national.

The first three dimensions — **Individual, Group, and Unit** — are where most teams start. The extended dimensions (**Org., Corp., National**) let you scale your principles to broader contexts when you're ready.

There are no right answers. The value is in the conversation.
